Quality Assurance Software Tester – Industrial Automation / Robotics

FlashCut CNC, an established, growth oriented, world leader in PC Based CNC controls is currently looking to hire a Quality Assurance Software Tester to join our software development team in Deerfield, IL. We are looking for an experienced team player with a strong interest in motion control, robotics and factory automation. The technician will work with a small group of development and test engineers on our sophisticated industrial automation system used in a variety of applications all over the world.

For over 25 years, FlashCut CNC has carefully built a team of motivated, intelligent people who strive for excellence and have fun doing it. Our emphasis on creativity and teamwork in a friendly work environment has helped us become a world leader in the automation field. Everyone at FlashCut is encouraged to turn ideas and inspiration into reality.

Responsibilities include:

- Test software functionality using a variety of test methodologies, including manual and automated regression testing
- Learning, running and ensuring the quality of our robotic controls and software
- Document and report test results to engineering team
- Understand customer requirements to ensure our software meets user expectations
- Maintain production test systems, to assure a high level of product quality

The candidate must have:

- Bachelor's or associates degree
- Knowledge of basic electronics
- Computer proficiency using Windows OS and Microsoft applications
- Excellent verbal and written communication skills
- Desire to work in a team environment
- A passion for assuring robust, high-quality software and electronics
- Excellent interpersonal skills for effective collaboration

FlashCut CNC offers very generous salary and benefits packages including:

- 100% of premium for individual health insurance
- Excellent 401K contribution from company
- Year-end bonus based on individual and company performance
- 100% of premium for life insurance
- Health club reimbursement

Highly qualified candidates please send your resume to HR@flashcutcnc.com
